Practical No. 7

Q) File Read operations

```
f = open("D:\demo.txt","r")

print(f.readline())

print(f.readline())

print(f.close())

f = open("D:\demo.txt","r")

print(f.read(5))
```

Output:

Output:

```
>>>
= RESTART: C:/Users/DYP/Desktop/python program
hii i am vivek

python is a high level programming language

None
hii i
```

```
========= RESTART: C:/Users/DYP/Desktop/python progra
hii i am vivek
python is a high level programming language
python is highly recommanded language.Python is used
sed for data science
```

Q) File Write operations

```
f = open("D:\demo.txt","a")

f.write("Python is used for data science")

f.close()

f = open("D:\demo.txt","r")

print(f.read())
```
