Practical No. 11

Q) Operations of Pandas library in python.

1) Create a simple Pandas Series from a list:

```
import pandas as pd

a = [1, 7, 2, 10, 30, 40]

myvar = pd.Series(a)

print(myvar)
```
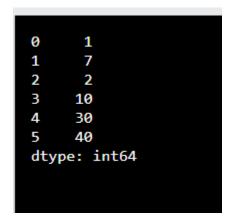

Output:

```
0     1
1     7
2     2
3    10
4    30
5    40
dtype: int64
```

2) Create a simple Pandas Data Frame

```
import pandas as pd

data = {

 "Names": ['Vivek', 'Yash', 'Pratik', 'Rohan'],

 "college": ['DYPTC', 'AIT', 'JJMCOE', 'SIT']

}

df = pd.DataFrame(data)

print(df)
```

Output:

```
    Names  college
0   Vivek    DYPTC
1    Yash      AIT
2  Pratik   JJMCOE
3   Rohan      SIT
```

3) Load the CSV into a Data Frame

```
import pandas as pd

df = pd.read_csv('data.csv')

print(df.to_string())
```

Output:

```
    Duration  Pulse  Maxpulse  Calories
0         60    110       130     409.1
1         60    117       145     479.0
2         60    103       135     340.0
3         45    109       175     282.4
4         45    117       148     406.0
5         60    102       127     300.5
6         60    110       136     374.0
7         45    104       134     253.3
8         30    109       133     195.1
9         60     98       124     269.0
10        60    103       147     329.3
11        60    100       120     250.7
12        60    106       128     345.3
```

4) Load the JSON file into a Data Frame

```
import pandas as pd

df = pd.read_json('data.json')

print(df.to_string())
```

Output:

```
    Duration  Pulse  Maxpulse  Calories
0         60    110       130     409.1
1         60    117       145     479.0
2         60    103       135     340.0
3         45    109       175     282.4
4         45    117       148     406.0
5         60    102       127     300.5
6         60    110       136     374.0
7         45    104       134     253.3
8         30    109       133     195.1
9         60     98       124     269.0
10        60    103       147     329.3
11        60    100       120     250.7
12        60    106       128     345.3
13        60    104       132     379.3
14        60     98       123     275.0
15        60     98       120     215.2
16        60    100       120     300.0
17        45     90       112       NaN
18        60    103       123     323.0
19        45     97       125     243.0
20        60    108       131     364.2
```

Output:

```
    Duration  Pulse  Maxpulse  Calories
0         60    110       130     409.1
1         60    117       145     479.0
2         60    103       135     340.0
3         45    109       175     282.4
4         45    117       148     406.0
5         60    102       127     300.5
6         60    110       136     374.0
7         45    104       134     253.3
8         30    109       133     195.1
9         60     98       124     269.0
```

5) Get a quick overview by printing the first 10 rows of the Data Frame

```
import pandas as pd

df = pd.read_csv('data.csv')

print(df.head(10))
```

6) Return a new Data Frame with no empty cells

```
import pandas as pd

df = pd.read_csv('data.csv')

new_df = df.dropna()

print(new_df.to_string())
```

Output:

```
    Duration         Date  Pulse  Maxpulse  Calories
0         60  '2020/12/01'    110       130     409.1
1         60  '2020/12/02'    117       145     479.0
2         60  '2020/12/03'    103       135     340.0
3         45  '2020/12/04'    109       175     282.4
4         45  '2020/12/05'    117       148     406.0
5         60  '2020/12/06'    102       127     300.0
6         60  '2020/12/07'    110       136     374.0
7        450  '2020/12/08'    104       134     253.3
8         30  '2020/12/09'    109       133     195.1
9         60  '2020/12/10'     98       124     269.0
10        60  '2020/12/11'    103       147     329.3
11        60  '2020/12/12'    100       120     250.7
12        60  '2020/12/12'    100       120     250.7
13        60  '2020/12/13'    106       128     345.3
14        60  '2020/12/14'    104       132     379.3
15        60  '2020/12/15'     98       123     275.0
16        60  '2020/12/16'     98       120     215.2
17        60  '2020/12/17'    100       120     300.0
19        60  '2020/12/19'    103       123     323.0
20        45  '2020/12/20'     97       125     243.0
21        60  '2020/12/21'    108       131     364.2
23        60  '2020/12/23'    130       101     300.0
24        45  '2020/12/24'    105       132     246.0
25        60  '2020/12/25'    102       126     334.5
26        60   2020/12/26     100       120     250.0
27        60  '2020/12/27'     92       118     241.0
29        60  '2020/12/29'    100       132     280.0
30        60  '2020/12/30'    102       129     380.3
31        60  '2020/12/31'     92       115     243.0
```
